

License	Feature Description	Sophos Email
Setup and Management		
Microsoft and Google compatible	<p>Sophos email works seamlessly with the following leading email service provider platforms to provide advanced email security:</p> <ul style="list-style-type: none"> • Microsoft Exchange Online and Microsoft Office 365 • Microsoft Exchange 2003 or later • G Suite from Google Cloud <p>Support is not limited to just these platforms - a simple MX configuration is all that's required. Contact sales to check your platform is supported.</p>	✓
Sophos Central cloud management and reporting	<p>Sophos Email protects and manages your email in the cloud through Sophos Central, providing access to the entire range of Sophos Central Products through one interface, including web, endpoint, mobile, and server.</p> <p>Browser requirements for Sophos Central management interface:</p> <ul style="list-style-type: none"> • Microsoft Internet Explorer 11 • Microsoft Edge • Google Chrome • Mozilla Firefox • Apple Safari 	✓
Active Directory Sync and Azure Active Directory Sync	<p>Microsoft Active Directory Sync (AD Sync) and Azure AD Sync gives organizations a simple way to move on premise Active Directory or Exchange environments to the cloud, with a quick route to on-board users to AD and Microsoft Office 365.</p> <ul style="list-style-type: none"> • Keep users automatically sync'd with Sophos Email using AD Sync • Full support of automatic updating of AD data where businesses have completely moved to the cloud 	✓
Manually enter alias records	Administrator access to manually add email address alias records when Active Directory is unavailable	✓
Self-service portal for end users	<p>Sophos Email provides your end users with access to the following tools:</p> <ul style="list-style-type: none"> • Manage quarantined emails (accept/delete emails) • Edit allow/block list rules • View messages in the event of an outage using the emergency inbox 	✓
Data center locations	<p>Meet data compliance regulations or simply improve end user experience with a choice of global data centres:</p> <ul style="list-style-type: none"> • Ireland (Dublin) • Germany (Frankfurt) • North America (Oregon) 	✓
Security		
Live threat updates stop the latest attacks	Powered by SophosLabs, Sophos Email provides live updates to protect against the latest threats.	✓
Anti-spam, anti-virus and anti-phishing detection	<p>Sophos Email inbound filtering blocks 99% of unwanted email at the gateway with a range of tools and security filters:</p> <ul style="list-style-type: none"> • Reputation filtering blocks 90% of spam • Our anti-spam engine that catches the rest, including the latest phishing attacks • Sender Genotype, our next-generation reputation filtering technology, eliminates botnet spam at the IP-connection level by monitoring connection requests and rejecting those showing evidence of botnet connections • Sophos Delay Queue provides protection against snow shoe spam* • Sophos CXMail advanced attachment scanning blocks infected attachments before they hit the inbox • Outbound email filtering* 	✓
Delay Queue to prevent snowshoe spam	Sophos Delay Queue gives you future proof protection against snowshoe and hailstorm spam - intelligently delaying suspicious mail to run further anti-spam checks. Then automatically rescanning content with updated definitions to increase detection.	✓
Block infected attachments	<p>Built and maintained by SophosLabs, the CXMail family of detection strategies designed to stop threats like ransomware that are predominately distributed using email. The higher detection rate of CXMail is achieved by identifying suspicious content that is not regularly associated with email communication.</p> <p>Specifically CXMail, blocks Office documents that serve as downloaders (software that downloads and installs additional malware and has been very effective in protecting customers from email-distributed ransomware.</p>	✓
Content filtering	Set outbound email scanning policies - check subject line, email body, to/from fields and file attachment content, then quarantined where required.	✓
Email quarantine	<p>Sophos Email's easy to use preset controls have your message quarantine policies setup and your business protected in seconds:</p> <ul style="list-style-type: none"> • High: Messages with a spam score less than 61 will be delivered • Higher: Messages with a spam score over 60 but less than 91 will be quarantined • Highest: Messages with a spam score over 90 will be deleted if you opt to do so, otherwise they will be deleted (Sophos Default) <p>The end user portal then lets users release mails on demand, and in-message quarantine digests provide a daily summary of quarantined mail, with the option to release direct from the inbox.</p>	✓
Allow/Block lists	The end user portal allows users to setup allow and block lists.	✓

Product and Licensing Overview

License	Feature Description	Sophos Email Standard
Security		
Sophos Synchronized Security*	Shared data between Sophos Email gateway, Sophos Endpoint and Sophos XG Firewall allow you to prevent compromised endpoints from sending spam campaigns from the corporate network and IP ranges – minimizing the impact of a security impact on your business. Endpoint data can also provide a further level of malicious attachment scanning, informing the Email gateway to improve future file scans.	✘
Enhanced spoof prevention policies*	Policy improvements inside Sophos Email ensure that mail is only delivered if the check agrees that the sender is who they claim - preventing spammers and malware writers from spoofing users.	✘
DMARC (including SPF & DKIM)*	Verifies the authenticity of email	✘
Business Continuity		
Spooling ensures no mail is ever lost	In the event of a disruption to your Microsoft or Google Cloud email service the recipient's emails are automatically queued with Sophos Email, then delivered once service is restored – with a retry period of 5 days.	✔
User access to 24/7 emergency inbox	Read access to queued email is provided from a 24/7 emergency inbox inside the end user portal	✔
Administrator alerts	In the event of third party cloud email service provider outages, alerts are provided when mail can't be delivered to a server/service	✔
